# Homework Set 3, CPSC 8420, Spring 2022

Last Name, First Name

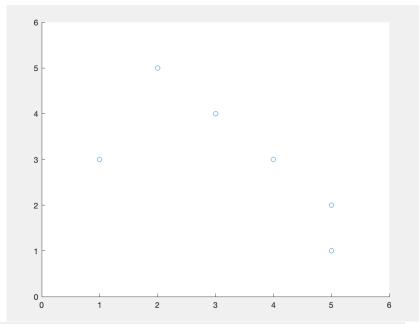

Due 03/31/2022, Thursday, 11:59PM EST

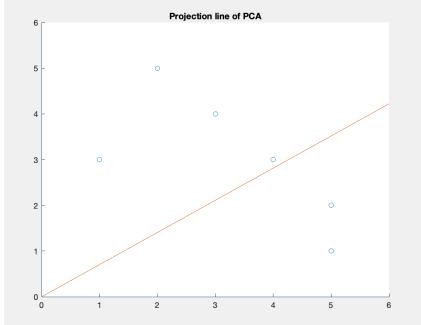

### Problem 1

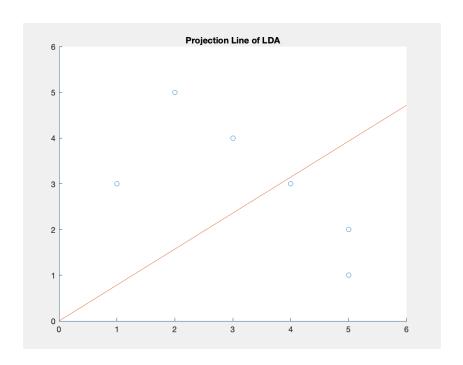

Given data-points  $\{\{1,3\},\{2,5\},\{3,4\},\{4,3\},\{5,2\},\{5,1\}\}.$ 

- 1. Please scatter-plot each data point within one figure (you can use Matlab, Python or any other programming language).
- 2. Now if we want to reduce the dimension from 2 to 1 by PCA, please determine the projection line which crosses the origin (please plot the line based on the scatter-plot figure above).
  - For the PCA projection line. I calculated the Covariance matrix and then performed an SVD on that matrix. I took the slope between the two points of the first column of U and got a slope of 0.7034.
- 3. Assume the first 4 data points belong to one class, while the rest 2 belong to the other. Now if we want to reduce the dimension from 2 to 1 by LDA, please determine the projection line which crosses the origin (you are expected to plot the line based on the scatter-plot figure).

For the LDA projection line I calculated the weights (W) of the data, multiplied that with the data and then calculated the slope using the first and last data point. Which I got to be 0.78

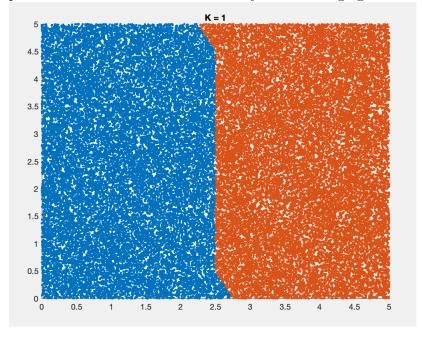

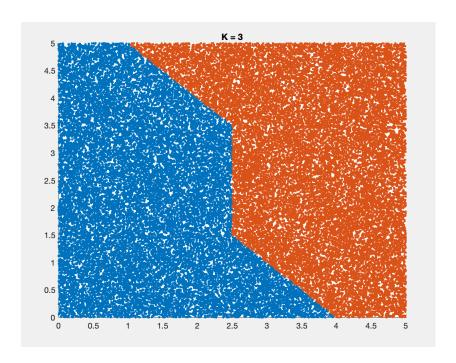

# Problem 2

Given positive data-set  $\{\{1,1\},\{2,2\},\{2,3\}\}$ , as well as negative data-set  $\{\{3,2\},\{3,3\},\{4,4\}\}$ , please determine the decision boundary when leveraging k-NN where k=1 and k=3 respectively.

## Problem 3

Given X, Y, Z, now please follow the idea/method used in LDA/PCA to find the best solution to:

$$\underbrace{arg\ max}_{a,b} \quad a^T Z b$$

$$s.t. \quad a^T X a = 1, \ b^T Y b = 1$$

$$(1)$$

Since X, Y, Z are SPD we can expand our constraints s.t.  $a^T X^{1/2} X^{1/2} a = 1$ ,  $b^T Y^{1/2} Y^{1/2} b = 1$ 

Let  $u = X^{1/2}a$  and  $v = Y^{1/2}b$ , therefore we have that  $u^Tu = 1$  and  $v^Tv = 1$ 

We can arrange to say that  $a^T = u^T X^{1/2}$  and  $b = Y^{1/2}v$  and therefore we  $\max u^T X^{-1/2} Z Y^{-1/2}v$ 

If we use SVD we find that  $[U, \Sigma, V] = svd(X^{-1/2}ZY^{-1/2})$ . We can then let u be the first column of U, and v be the first column of V, and then find a and b.

### Code

NOTE: For plotting data points on graph I just removed some aspects of the PCA projection code. **PCA Projection Line Code** 

```
 \begin{array}{ll} {}^{1} & {\rm clc}\,; & {\rm clear}\,; \\ {}^{2} & {\rm a} = \; [[1\;,3];[2\;,5];[3\;,4];[4\;,3];[5\;,2];[5\;,1]]; \\ {}^{3} & {}^{3} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {}^{4} & {
